DETAILED ACTION

Appeal Conference

1. Base upon the appeal conference with primaries ^{Panel} ~~panel~~, Young Lee, Vu Le, and Anand Rao, they agreed with the appellant's appeal brief that the cited references in the final rejection, Paper No. 17, are not combinable to make the claimed invention obvious. The panel recommended the examiner to withdraw the final rejection, Paper No. 17 dated 11/19/02 and reopen examination with the restriction-election of the claimed invention.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 4, 5, 7-9, 11-18, drawn to the surveillance system used for the computer network, classified in class 348, subclass 15.
 - II. Claims 26-31, 29-44, 47-48, drawn to the system used for the general purpose of detecting alarm notification, classified in class 348, subclass 170.
 - III. Claims 49-50, 52-66, drawn to the surveillance system used for a web browser, classified in class 340, subclass 541.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in group I, II, and III has separate utility such as a surveillance system with email, a general purpose of computer, a remote visual monitoring with a web-browser. See MPEP § 806.05(d).

Art Unit: 2613

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
